THE REV. L. A. D. WOODLAND,

GENERAL APPEAL.

1.—The Board of Management of THE ROYAL NATIONAL HOSPITAL FOR CONSUMPTION AND DISEASES OF THE CHEST ON THE SEPARATE PRINCIPLE beg to call special attention to the claims of this Hospital, and to solicit, on the following grounds, the generous support of the benevolent :—

2.—It is in the truest and widest sense of the words **A National Institution.** It opens its doors to applicants from all parts of the British Isles, **National** without distinction of sex, creed, or religious **Institution.** denomination. There is accommodation for 163 patients.

3.—The Hospital is under the Patronage of Their Majesties The King and Queen, and Queen Mary. Her late Royal Majesty Queen Victoria signified her gracious **Patronage.** approval and appreciation of its objects by granting to it a royal charter of incorporation in 1885. Her late Majesty was also graciously pleased to honour the Hospital by a personal visit on February 11th, 1888, and to express approval of the arrangements for the comfort and treatment of the Patients. A Block of Houses has been named “The Queen Victoria Block” after Her late Majesty. His late Majesty King Edward VII graciously visited the Hospital in 1902, and inspected the whole of the Institution. Her Majesty Queen Mary visited the Hospital on 5th August, 1920, and was graciously pleased to send her autographed portrait and that of His late Majesty King George V, in commemoration of this

visit. His Royal Highness The Duke of Windsor opened the Thomas Lampard Green Nurses' Home on 22nd July, 1926, and also inspected the Hospital.

4.—The Site. This Hospital is situated in one of the loveliest and most sheltered spots of the Undercliff of the Isle of Wight, the climate of which is most suitable for the treatment of the special diseases for which the Hospital was established. On the west the site is protected by a row of high trees, and is somewhat under the shelter of the Undercliff in the distance ; on the north it is backed by woodland sweeping up to the Undercliff range in the background ; on the east shelter is afforded by the rising ground in front of Steephill Castle ; and on the south or sea aspect, which the sitting and sleeping rooms face, the undulating nature of the ground offers considerable protection, and yet allows charming views of the sea, which is distant about three hundred yards.

The grounds cover over twenty acres of a well-drained land, sloping generally towards the sea, laid out as terraces, lawns, pleasure grounds, flower and vegetable gardens, in which, in accordance with the now generally accepted treatment, the patients are encouraged to take exercise and engage in such labour and occupation as, in the judgment of the physicians, is suited to their respective powers and conditions of health, a course which has proved most beneficial.

5.—Design and Construction. Founded in the year 1867 by Dr. Arthur Hill Hassall, the Hospital was designed and erected on the separate or cottage principle. It now comprises eleven blocks of buildings, affording accommodation for 81 men and 90 women, IN SEPARATE BEDROOMS.

6.—Dietary. It is universally admitted that good and proper food is essential in cases of Consumption. Therefore the greatest care is taken with the dietary of the patients, and especially with the milk, which is pasteurised, and is of the purest character obtainable.

7.—It is unnecessary at the present day to enlarge upon the fact that Consumption is one of the most prevalent **Prevalence** distressing and fatal of the maladies to which our **of Con- sumption.** fellow-countrymen are subject. Though specially a disease of the poor, no class of society is exempt from it. It particularly affects cities, ravages the ranks of dwellers in crowded areas, and of workers engaged in sedentary occupations. It is not surprising, therefore, that the Hospital has been fully occupied from the day when the first Block of Houses was opened, and there are usually many applicants waiting for admission. Over 38,000 In-Patients have already received the benefits of the Hospital. These facts prove that the Institution has, from the first, supplied a great public and national want.

8.—The Patients admitted are chiefly in the incipient or early stages of the disease, and the results **Early Stages.** achieved have been very gratifying and encouraging, many of the inmates having been enabled, upon return to their homes, to resume their usual occupations. They express themselves as most thankful and satisfied with their treatment at the Hospital.

9.—The Board, in common with the majority of hospital managers of the present day, being of opinion that **Weekly Payments.** a payment of some kind by the Patients is desirable, require £2 2s. 0d. per week towards the cost of maintenance, which averaged £3 13s. 6d. a week in 1938.

10.—An earnest invitation is extended to all who can do so, **Approval by Visitors.** to pay the Hospital a personal visit, which, it is felt, will enhance the satisfaction and pleasure felt by all connected with this work of charity. The Board of Management take pleasure in the fact that many hundred visitors have expressed very high approval. A large number of distinguished philanthropists, members of the medical profession (including foreign physicians), and others

who take interest in charitable work, have specially visited the Hospital, and in some instances, plans have been requested with a view of erecting, elsewhere, Hospitals on similar principles.

11.—Patients are received from all parts, and about one-half the number come from the Metropolitan area.
Patients received from all parts. The Hospital has, consequently, afforded great benefit to the inhabitants of this Kingdom, and London especially—a fact recognised by most of the City Livery Companies and by the Council of the Metropolitan Hospital Sunday Fund, who award grants to this Institution.

Maintenance of the Hospital.

Since the war medical and surgical knowledge has been applied much more intensively to consumption, as to all disease, and the staffing and equipment is much in advance of pre-war days. Although patients contribute £2 2s. 0d. a week, there is a large proportion of the cost of treatment to be met by voluntary gifts. There is no Government aid. King Edward VII Hospital Fund for London can only help work done within eleven miles of St. Paul's Cathedral, so the Hospital can only exist by Annual Subscriptions, Donations, and Legacies, all of which are most anxiously requested to maintain this truly national charity.

RATES OF SUBSCRIPTION.

The Bye-Laws relating to the qualifications and privileges of future Governors are printed *in extenso* on pages 58 to 61.

A Donation of Fifty Guineas (either paid at one time or at different periods within three years) constitutes a Life Governor ; an Annual Subscription of Five Guineas, an Annual Governor.

One payment of Five Guineas does not constitute an Annual Governor, it being the intention of the Royal Charter that an Annual Governor shall be one who will continue the same yearly ; as by Clause 9 of the Charter the amount required to constitute a Governor for one year is a Donation of Ten Guineas.

Donors of the sum of £525 are entitled always to have one patient in the Hospital, subject to the Rules, etc.

The Board of Management are prepared to set apart one Bed in perpetuity (to be named, if desired, after the Donor) in return for a gift of £1,000, with the Right of Presentation to that Bed by the Donor during life, subject to the Rules of the Hospital, the Donor also having the power to bequeath the Right of Presentation to any one person he or she may appoint.

DONATIONS AND SUBSCRIPTIONS *will be thankfully received by the Treasurer ; and by the WESTMINSTER BANK LIMITED, St. James's Square, London ; LLOYDS BANK LIMITED, Ventnor Branch ; the Medical Superintendent at the Hospital ; and by the Secretary, MR. H. R. ROWE, at the Offices, 18, Buckingham Street, Strand, London, W.C.2, from whom all further information can be obtained.*

Telegraphic Address : "UNDERCLIFF, RAND, LONDON."
Telephone: TEMPLE BAR 6303.

Cheques and Post-Office Orders may be made payable to the Secretary
and crossed
Westminster Bank Limited, St. James's Square.

Privileges OF Governors and Subscribers.

The following revised Rates of Subscriptions came into force on the 19th March, 1903, but Subscribers and Donors previous to that date will continue to receive Letters on the old scale :—

- £5 5 0** ANNUAL SUBSCRIPTION constitutes a Governor with ONE Letter of Recommendation ANNUALLY.
- £10 10 0** DONATION constitutes a Governor for ONE year with ONE Letter of Recommendation.
- £52 10 0** DONATION (either paid in one sum or within 3 years) constitutes a Life Governor with one Letter of Recommendation annually.
- £52 10 0** ANNUAL SUBSCRIPTION or
- £525** DONATION entitles the Governor to the privilege of a Presentation Bed, i.e., of having always one Patient in the Hospital.
- £1000** DONATION entitles the Donor to the Right of Presentation to one Bed (to be *named* if desired after the Donor, or "*In Memoriam*," in perpetuity), the Donor also having power to bequeath the Right of Presentation to any one person whom he or she may appoint.

Executors or Trustees having discretion to select the charitable Institution to be benefited are entitled to nominate one of their number to receive the privileges such person would have been entitled to if the actual donor of the contribution.

THIS IS A CODICIL to the last Will and Testament of me

dated

I bequeath to the President and Governors of THE ROYAL NATIONAL HOSPITAL FOR CONSUMPTION AND DISEASES OF THE CHEST, on the Separate Principle, Ventnor, Undercliff, Isle of Wight, the sum of

free of all duty, to be applied in and towards carrying on the charitable objects of the Institution ; and I direct that the receipt of the Treasurer for the time being shall be a sufficient discharge to my executors for the same, and in all other respects I confirm my said Will.

IN WITNESS whereof I have hereunto set my hand this

19
day of _____

Signed by the Testator as and for a
Codicil to his last Will and Testament
dated _____
in the presence of us, both present at
the same time, who at his request, and
in his presence, and in the presence
of each other, have hereunto set our
names as witnesses.

INCOME TAX ON ANNUAL SUBSCRIPTIONS

The Income of Charities is exempt from Income Tax, and if an Annual Subscriber who is an Income Tax Payer fills up the form of agreement printed on the other side, he enables the Hospital to benefit further (at no additional expense to himself) by recovering Income Tax on his subscription ; and he can himself deduct the amount of his subscription (*plus* Tax) from his surtax return.

Examples—

- Column 1. The subscriber sends a cheque for, say, £5 5s. 0d., and a voucher that he has paid Income Tax on the amount. (The Hospital will, after the receipt of the cheque, supply the necessary form of voucher, which will only require to be signed and returned.).
- Column 2. The Hospital recovers the Income Tax direct from the Inland Revenue Authorities.

On an annual subscription of—	Income Tax would be recovered by the Hospital to the amount of— (at 5/6 in the £)	Making the subscriber's total gift to the Hospital each year—
COLUMN 1.	COLUMN 2.	COLUMN 3.
£ s. d.	£ s. d.	£ s. d.
1 1 0	0 7 11	1 8 11
2 2 0	0 15 11	2 17 11

N.B.—In the case of death of a subscriber within the seven years the agreement becomes void and does not create any charge on his estate.

Any subscriber who is willing to adopt this scheme is requested to apply to—

The Secretary,

THE ROYAL NATIONAL HOSPITAL FOR CONSUMPTION,
18, BUCKINGHAM STREET, STRAND,
LONDON, W.C. 2,

for the necessary form.

MEDICAL REPORT, 1938.

During the year there were 386 applications for admission to the Hospital, of whom 345 were accepted as suitable for treatment. 333 cases were admitted, and all beds were full throughout the year. The waiting list averaged 19, and the average period of waiting was 5 weeks.

326 patients were discharged during 1938. 7 patients were discharged as not suffering from Pulmonary Tuberculosis. 15, one of whom died not from pulmonary tuberculosis, stayed less than 10 days and so are not included, leaving 304 CASES OF PULMONARY TUBERCULOSIS, on whom the following report is based :—

246	patients were discharged "Improved"	80.9%
28	" " " Stationary"	9.2%
19	" " " Worse"	6.3%
11	" died in Hospital	3.6%

EXCLUDING THOSE THAT DIED IN HOSPITAL.

216	patients gained weight while in Hospital	73.7%
37	" remained unaltered	12.6%
40	" lost weight	13.7%

164 patients had Tuberclle Bacilli found in their sputum on admission, and 98 (59.8%) of these were discharged "Negative."

162	patients were discharged "Fit for Work"	55.3%
66	" " " Fit for Light Work"	22.5%

RESULTS OF TREATMENT CLASSIFIED ACCORDING TO CONDITION ON ADMISSION.

(The classification adopted is "A" for all cases in which tubercle bacilli have never been found, and "B1, 2, or 3," according to the severity, in all cases in which tubercle bacilli have at any time been found.)

Group.	Cases.	Result.	Discharged as Fit for		
			Work.	Light Work.	No Work.
" A "	76	73 Improved ... 96% 3 Stationary ... 4% 0 Worse ... — 0 Died ... —	66	6	1

				1	15
				—	16

All patients were treated on routine Sanatorium lines. In addition, 132 received Special Treatment such as Collapse Therapy and Gold Salts. Nearly all cases required rest in bed at first. All cases discharged Fit for Work or Light Work reached full walking exercise of 6 miles a day, and 12 patients were able to do work in the gardens while in Hospital.

The average length of stay in Hospital was 182 days.

ARTIFICIAL PNEUMOTHORAX.

This was attempted in 109 cases. In 21 a complete collapse was obtained, in 64 a partial collapse was obtained, and in 24 either no space could be found, or only a small pocket which could not be developed.

Out of 64 cases of partial collapse, 6 were abandoned because of contra-selective collapse, and 2 because of obliterative pleurisy.

Of the remaining 56 cases, 30 were converted into complete collapse by the division of adhesions, and 4 improved sufficiently to render the sputum negative.

Phrenic avulsion was performed in 14 of these artificial pneumothorax cases. Of the 77 cases who were discharged with an artificial pneumothorax, 66 had sputum containing tubercle bacilli on admission, and only 9 had positive sputum on discharge.

27 patients were admitted with an artificial pneumothorax. One of these was abandoned because the lesion was quiescent, one because the collapse was contra-selective, and 4 obliterated. One other had been abandoned before admission because of a streptococcal empyema, and another was abandoned a month after admission because of a developing tuberculous empyema; this absorbed as the space obliterated. The remaining 20 were maintained and adhesions were divided in 4, converting partial into complete collapse. 2 of these cases had positive sputum on admission, and both were discharged negative.

18 pneumothorax cases developed a clear pleural effusion, which absorbed before discharge in all but 4 cases.

5 artificial pneumothorax cases had a spontaneous perforation followed by infection of the pleural cavity. Two were

drained, one being discharged with the pleural cavity obliterated and the sinus healed, and the other was discharged still draining. The other three died.

4 other cases developed tuberculous empyema. 2 were left alone for six months and then aspirated : in one of these no fluid returned, the other was discharged with a small stationary empyema. Another case was aspirated and replaced with gomenol, which proved very successful and maintained a selective collapse. The fourth case was drained and the space closed by thoracoplasty.

5 artificial pneumothorax cases died. In one, the artificial pneumothorax was induced for haemoptysis, but the patient died in spite of it. In 2 cases the lung perforated several months after induction, and both cases died from a mixed pyogenic infection. In one other case the pulmonary cavity, perforated into the pneumothorax, a broncho-pleural fistula formed, and the patient died from aspiration pneumonia. In the other case the artificial pneumothorax was induced in a girl with advanced bilateral disease, but failed to control the spread.

BILATERAL PNEUMOTHORAX.

This was induced in 8 cases. 6 were discharged with bilateral pneumothorax, all sputum free, though one had a bilateral pleural effusion and one a unilateral effusion. In one case the right pneumothorax was abandoned because of fluid and he was advised to return in six months for a thoracoplasty. In the remaining case both were abandoned because of bilateral pleural effusion. 2 patients were admitted with bilateral pneumothorax. In one case both were abandoned as contraselective and in the other the left was abandoned as it had been established four years and the lung was healed.

DIVISION OF ADHESIONS.

Of the 36 cases in which adhesions were divided, 9 developed a sterile pleural effusion sufficient to cover the diaphragm. Of these, 5 absorbed spontaneously, 2 required aspiration and were discharged free from fluid, and 2 were discharged with a pleural effusion. One patient developed a tuberculous

empyema but this cleared up and she was discharged with a complete pneumothorax free from fluid. One had a spontaneous perforation 4 months after operation and died of bronchopneumonia. In 2 cases of bilateral pneumothorax adhesions were divided on both sides.

Cases.	Result.	Work.	Light Work.	No Work.
97	Improved ... 89	57	24	8
	Stationary ... 0	—	—	—
	Worse ... 3	—	—	3
	Died ... 5	—	—	—

PHRENIC PARALYSIS.

This was performed on 35 patients :—

16 in order to improve collapse in artificial pneumothorax, 9 for obliterating or abandoned pneumothorax, 4 for unilateral cases in which pneumothorax had failed, 6 for unilateral cases as the treatment of choice. 30 of these cases were admitted with positive sputum and 8 were discharged positive.

Excluding 2 cases in which phrenic avulsion was performed prior to abandoning an artificial pneumothorax that had been established several years and the disease was quiescent, 17 cases were treated by phrenic interruption as the only form of "relaxation therapy."

Of these cases 13 had positive sputum on admission and 6 were positive on discharge. 12 cases had a definite radiological cavity a centimetre or more in diameter, and in 8 of these no cavity could be demonstrated on discharge.

Cases.	Result.	Work.	Light Work.	No Work.
35	Improved ... 28	20	4	4
	Stationary ... 3	—	1	2
	Worse ... 2	—	—	2
	Died ... 2	—	—	—

THORACOPLASTY.

6 cases had thoracoplasty performed : 4 by two stages and 2 by three stages. The 2 latter were done for empyema, which had previously been drained, and operation successfully closed the space. The 4 others had positive sputum on admission, and were all discharged without sputum. One developed a mid-zone spread in the contra-lateral lung, and this was completely controlled by the immediate induction of a pneumothorax.

Cases.	Result.	Work.	Light Work.	No Work.
6	Improved ... 6	3	2	1
	Stationary ... 0	—	—	—
	Worse ... 0	—	—	—
	Died ... 0	—	—	—

EXTRA PLEURAL PNEUMOTHORAX.

This was performed in 4 cases. In 3 cases the pleura was adherent and intra-pleura pneumothorax had proved impossible. In all 3 cases a very satisfactory collapse was obtained, and the sputum abolished. One of these cases was re-admitted 7 months after operation as the space was obliterating, and the air was replaced by olive oil which is maintaining collapse. In the fourth case a basal pneumothorax was present containing fluid, sterile on culture ; the apex was freed and the extra pleural space joined into the pneumothorax, producing a complete collapse ; cough and sputum rapidly vanished, but the fluid became purulent and tubercle bacilli grew on culture ; this was aspirated several times, but a cold abscess formed, so thoracentesis was discontinued ; the abscess healed and the patient was discharged "very well" with a complete collapse of his lung and a small stationary empyema.

GOLD.

24 patients were treated by the injection of Gold salts. In 6 cases the injections had to be discontinued because the patient had a reaction to Gold. In 16 cases the Gold was in addition to collapse therapy.

Of the cases treated by Gold alone, 6 had positive sputum on admission, and only 2 were positive on discharge. All 8 cases improved and 4 were fit for work on discharge.

COMPLICATIONS occurring in patients suffering from Pulmonary Tuberculosis.

TUBERCULOUS.		NON-TUBERCULOUS.	
Pleurisy	5	Chronic Bronchitis ... 16
Laryngitis	18	Rheumatic Heart Disease 1
Spontaneous Pneumothorax		8	Appendicitis ... 1
Empyema	12	Epilepsy ... 1
Enteritis	2	Pyaemia, following tooth extraction ... 1
Peritonitis	1	Carcinoma of colon ... 1
Ischio-rectal Abscess	...	2	
Cold Abscess from rib	...	1	
Bronchiectasis	1	
Kidney, Tuberculous ...		1	

Patients found suffering from other diseases :—

Pneumococcal Meningitis	1	Carcinoma Oesophagus	1
Asthma ...	2	Mitral Stenosis ...	1
Chronic Bronchitis ...	2	Stenosis of Main Bronchus	1
Bronchiectasis ...	2		

X-RAY DEPARTMENT.

2,634 Films were taken during 1938 :—

2,303 Chest (postero-anterio)	14 Chest (after injection of
28 „ (stereoscopic)	Lipiodol)
	87 Others.

For the first time for many years there has been little increase in the number of films taken. In this connection it is of interest to compare the Report of 1928, in which the total number of X-rays taken in the previous $4\frac{1}{4}$ years was 1,112. All patients have X-ray examination on admission and prior to discharge, and serial X-rays are taken approximately monthly during their stay in hospital. Besides this, stereoscopic X-rays are taken in many cases prior to division of adhesions, and all artificial pneumothorax cases are screened frequently.

PATHOLOGICAL DEPARTMENT.

1,400 Sputum examinations were made.

27 Specimen of sputum were cultured.

32 Pleural effusions were cultured.

In all cases in which sputum is present this is examined every month, and in the event of a negative, three consecutive tests are made prior to discharge. In cases where the result of sputum test is of importance in deciding treatment, negative cases are cultured on Lowenstein-Jenson medium. All pleural effusions are cultured, and the results have been very satisfactory.

OPERATIONS PERFORMED IN 1938.

Thoracoplasty, upper stage	9	Thoracoscopy and division of adhesions	75
„ 2nd stage	7	Extra Pleural Pneumothorax	8		
„ 3rd stage	4	Bronchoscopy	6
Phrenic Paralysis ...	32	Open division of Adhesions	1		
Thoracoscopy alone	... 17	Appendectomy	1

OPERATING THEATRE.

The use of surgery has steadily increased, and this year it has only been necessary to transfer two cases to other Hospitals for operations. Extrapleural pneumothorax has proved very successful in certain cases, but the incidence of tuberculous infection of the space has been disappointing, and there is a tendency to reserve this operation for cases in which thoracoplasty is absolutely contra-indicated.

Cases of thoracoplasty have been very successful. During the past six months all cases have been done under local anæsthetic, and though the actual operating time is lengthened, the improved post-operative condition, and absence of complications, are very satisfactory.

All cases of thoracoplasty that have been performed in the Hospital have been followed up, and out of 41 cases only two are untraced. Of the 41 cases, four died in Hospital, and three others have died subsequent to discharge one a year.

after the original operation following a further operation elsewhere, one three years, and the other four years after operation. Of the remaining thirty-two who are alive and traced, twenty-three are well, working, and free from sputum. Six of these have been out of Hospital 4-5 years.

Thoracoscopy has been performed in all cases of incomplete pneumothorax where there has been sufficient space, and it has been possible to divide adhesions and produce a satisfactory collapse in some unexpected cases. In our experience there have been no serious complications following thoracoscopy, one case produced a transient effusion, and in another emphysema caused discomfort for a few days. Even in the presence of a pleural effusion thoracoscopy has not been detrimental; in fact in one case of acute effusion which had been pyrexial for 9 days, the temperature fell immediately, and the fluid, which had been aspirated at thoracoscopy and found to contain tubercle bacilli, did not recur. In 17 cases thoracoscopy showed adhesions that were not suitable for division.

In 62 other patients, adhesions were divided, in 50 at one operation lasting from a half to two hours, in 9 it was necessary to complete by a second operation a week or two later, either because the adhesions were too extensive, or in order that the stump might retract, and in three cases three operations were necessary. The technique used has been that of enucleation, whereby adhesions, with the exception of those attached to the mediastinum and great vessels, are separated from the chest wall by dividing the surrounding parietal pleura with a dull red cautery, and stripping the adhesion largely by blunt dissection. The diathermy is only used in the event of haemorrhage. In no case was pyrexia lasting more than three days caused by the operation, and in only one case, in which a large area of lung was stripped off the chest wall by blunt dissection, was there any post-operative shock. Arterial haemorrhage was encountered in three cases, two of which were controlled by diathermy, and the third by continuous pressure for one-quarter of an hour by means of a swab. Bleeding occurred in several other cases, but was always easily controlled by diathermy.

Surgical emphysema only caused more than mild discomfort in two cases. In one it was general, over the chest,

neck and abdomen, but soon absorbed. In the other it was confined in the chest to the pectoral muscle, and extended down the arm, coming up like a balloon every time the patient coughed. This continued for ten days, and daily refills were necessary, but eventually the puncture closed.

A small effusion occurred in the large majority of cases, but in two-thirds of the cases it was not sufficient to cover the diaphragm, and absorbed spontaneously. The fluid was aspirated in those cases in which it covered the diaphragm, and recurred in only two cases. In six cases a clear pleural effusion occurred more than two months after operation, two of which were in the same patient with a bilateral artificial pneumothorax. Empyema (tuberculous) followed operation in two cases. Five operations were performed in the presence of fluid. In one the fluid increased rapidly, in two it remained stationary. The other two were aspirated at operation, and in one the fluid did not return, and in the other it slowly re-accumulated up to its previous level. Two other cases had a perforation of the lung, one four months later, and the other seven months later. In the former, adhesions were divided to free a very large thin-walled cavity, which remained round and uncollapsed, and probably burst owing to "ball-valve block" of the bronchus.

The immediate results of internal pneumonolysis have been excellent ; out of 59 cases in which cavities were visible before operation, in 46 cases the cavities have apparently closed, and out of 52 positive cases, 43 have been negative two months later. In many of the cases it is most improbable that the cavities would ever have healed with incomplete artificial pneumothorax, and an uncollapsed cavity is generally acknowledged to be a danger. In addition a complete collapse makes the eventual re-expansion a far safer procedure.

It is no exaggeration to state that by the division of adhesions we have been able to double the number of successful pneumothoraces, and in view of the few serious complications arising in the cases undertaken during the past year, it would appear that there is every justification for our recent policy of routine thoracoscopy in all cases of incomplete artificial pneumothorax.

FOLLOW UP.

From 1934, from which year this record commences, up to 31/12/37 :—

1,283 patients were discharged from the Hospital, of these :—

88 were re-admission cases.

50 were found not to be suffering from Pulmonary Tuberculosis.

51 patients stayed less than 50 days and are not included.

Leaving 1,094 patients, the results of whose treatment is shown in the following tables.

The tables show the percentage of patients alive a stated number of years after discharge.

Those lost sight of have been recorded, but the percentage is based on the total before these have been deducted. It is therefore probable that all percentages should be 3 or 4 per cent. higher, particularly in the tables of special treatment where the numbers are small.

Patients who have been re-admitted for further treatment are classified under the original year of discharge.

The tables showing result of special treatment include cases in which the treatment has been commenced before admission.

Considering the fact that these records were not started until the end of 1937 and that it was therefore necessary to get in touch with patients who had left as long as 4 years previously, it is felt that the percentage of untraced cases (9.5%) is remarkably low. It is hoped that in future this percentage will be even lower.

TABLE I.

All Cases.

1936 ...	12	1	91.7	91.7	—	—
1937 ...	11	0	100.0	—	—	—

*—The relatively large number of cases in this year is due to the fact that, prior to 1934 all cases requiring Thoracoplasty were sent to the Brompton Hospital for operation and afterwards re-admitted for sanatorium treatment ; consequently under 1934 are included a number of cases whose actual operations were performed in 1932 and 1933 and who returned in 1934 for sanatorium treatment.

Since 1934 Thoracoplasty operations have been performed at the hospital.

REGULATIONS AS TO ADMISSION OF PATIENTS.

1.—This Hospital is established for the treatment of Patients suffering from Tuberculosis or other Diseases of the Respiratory Organs.

Children under 12 years of age cannot be accepted as patients.

2.—The cases eligible for admission are those which are in an **INCIPIENT OR EARLY STAGE OF DISEASE** or such as are likely to derive benefit from the treatment available.

3.—Applicants for admission should write to the Secretary at 18, Buckingham Street, Strand, London, W.C.2, who will provide the necessary forms and information.

4.—**FEES.** All patients are required to obtain a Letter of Recommendation (after suitability for treatment has been determined) and pay £2 2s. a week, fortnightly in advance. Payments are collected by the Steward at the Hospital.

For those patients who are desirous of obtaining treatment at Ventnor but are unable to afford the weekly fee, it is pointed out that Public Authorities are empowered to pay for treatment at Ventnor. All information concerning this should be obtained from the Tuberculosis Officer for the district. The Hospital cannot furnish further information on this point.

A **Guarantee Fee of £1** must also be deposited with the Steward by **every patient**. This sum will be returned to the patient on leaving the Hospital, subject to the right of retaining the same, or any part thereof, for payments due to the Hospital, or for damage done.

5.—Candidates will be eligible for admission in the order of their applications.

6.—The time during which Patients are retained in the Hospital varies, according to the necessity of each case. The term of residence is decided by the Medical Superintendent, acting in consultation with the Medical Visitors, and Patients must understand that no period of stay is guaranteed. Cases found to be unsuitable cannot be retained.

7.—A Patient cannot be re-admitted until at least twelve months have expired from the date of his or her departure from the Hospital, unless the case be specially recommended by one of the Honorary Physicians or by the Medical Superintendent.

8.—No Patient shall be eligible for re-admission to the Hospital who has been dismissed on a former occasion for breach of any of the rules or regulations, except with special permission of the Board of Management.

9.—All Patients will be required to conform STRICTLY TO THE RULES framed for the internal management of the Hospital. Copies of these rules are exhibited in each Block,

10.—Patients must defray their own travelling expenses. No responsibility can be accepted for care of patients during the journey to or from the Hospital.

N.B.—All communications concerning patients after their admission, should be addressed to the Medical Superintendent at the Hospital, Ventnor.

YEARLY SUMMARY OF METEOROLOGICAL OBSERVATIONS

*Taken at the Royal National Hospital for Consumption, Ventnor,
during the year 1938.*

. . . THE . . .

SEVENTIETH ANNUAL REPORT
OF THE BOARD OF MANAGEMENT

For the Year ending 31st December, 1938.

Presented to the Annual Meeting of Governors on
8th MAY, 1939.
The Right Honourable LORD EBBISHAM, G.B.E.
in the Chair.

It gives the Board great satisfaction to record the continuance of the gracious patronage of Their Majesties the King and Queen and of Her Majesty Queen Mary.

The increasing cost of treatment, foreshadowed in the last two reports, has become most marked this year as can be seen from the accounts which show an increase in expenditure of some £1,350 and a total deficit of £1,935. Income increased by £130 and the Board, while thanking all supporters, wish particularly to mention the following :—

	£	s.	d
Trinder, Tommy, Esq.	520	9	0
Trustees of Prison Charities	500	0	0
Earl of Northampton's Charity	300	0	0
Prudential Assurance Co., Ltd.	210	0	0
Benefvolent and Orphan Fund of the National Union of Teachers	163	16	0
Patients' Guild of Helpers	144	16	4

					£	s.	d.
“ Alexandra Day ” Committee	100	0	0
Union-Castle Mail Steamship Co., Ltd.	105	0	0
Harrods Benevolent Fund	105	0	0
Midland Bank Ltd.	105	0	0
Metropolitan Hospital Sunday Fund	100	0	0
Bernhard Baron Charitable Trust	100	0	0
Grocers, The Worshipful Company of,	100	0	0
Leaf, A. A., Esq.	100	0	0
L. M. & S. Railway Hospital Fund (Crewe)	94	10	0
Liverpool Victoria Friendly Society	78	15	0
Couchman, J. W., Esq.	52	10	0
Post Office Sanatorium Society	52	10	0
Southern Railway	52	10	0
Rubery Owen & Co., Ltd.	52	0	0
Worshipful Company of Clothworkers	50	0	0
Delmar Charitable Trust, The	50	0	0
Goldsmiths, The Worshipful Company of	50	0	0

Finance. Annual subscriptions and donations each show a decrease of roughly £100 but, considering the uncertainty of the international situation, increase in taxation, and the large sums of charitable money collected for various refugee funds, this reduction is not nearly so large as might have been expected.

The Board wish to express their gratitude to Mr. Tommy Trinder, the well-known comedian, for the money he has so kindly collected on behalf of the Hospital. Mr. Trinder was the star of the concert party at Shanklin Pier Theatre last summer and, after giving a performance at the Hospital, became so interested in the work that, with the kind permission of the Manager, Mr. H. Terry Wood, he appealed for the Hospital from the stage every evening during August and

September and raised the magnificent sum of £525. The Board hope that his interest will long continue.

The increase of some £550 in payments from Patients and Public Authorities is due to an increase in the number of beds available; during the year 5 chalets have been constructed in the grounds and have proved very popular with the patients, as well as helping to relieve the pressure on the waiting list.

The profit on the Pig Farm and Kitchen Gardens again shows an increase; that the profit on this department has increased by 200% in the last 3 years is a remarkable tribute to the ability and hard work of Mr. Bibby the head gardener.

The increase in expenditure has been a necessary corollary to the expansion of the work of the Hospital. Nursing salaries show a rise of nearly £300 due partly to increased salaries and partly to the Hospital's participation in the Federated Superannuation Scheme for Nurses. The Board feel there will be general approval of the benefits the Nursing Staff will gain by these new arrangements. The rise of £200 in salaries to "Other Officers" is accounted for by the employment of an additional part-time clerk for the "follow-up" (the first results of which appear on pages 25 to 28) and to expenses which have had to be incurred in connection with the Chaplaincy. The increasing use of the Operating Theatre and X-Ray room have made it necessary to employ extra porters. Other marked increases in expenditure have been on Provisions, an increase that was unavoidable in view of rising prices, and on Renewals and Repairs, the biggest item in which was the re-wiring and re-decorating of Block IX which could no longer be postponed. Annual cleaning and painting shows a decrease as the outside of the Hospital did not require painting.

Additions. The new Consulting Room for the Medical Superintendent and the Dining Room for the Medical Officers were completed during the year and are proving of the greatest benefit. The appearance of the Chapel Tower has been greatly improved by an extremely handsome electric clock, the gift of Miss Tingey, while the installation by Colonel Leaf of a Press Lamp Signalling system on Division 2 has proved a great boon to the Nursing Staff by saving the time and trouble that were previously necessary to enable them to ascertain where they were wanted.

Mr. Nunn has again been busy, and the Board wish once more to express their gratitude. He has greatly improved the "sub-way" which from being by its nature somewhat gloomy has become a relatively bright and cheerful passage ; he has made several other small improvements but his biggest benefaction, the building of extra bedrooms, was not completed during the year and therefore does not come into this report.

Executive. The following members of the Board who retire by rotation, being eligible, offer themselves for re-election, namely : Mr. John Burgoyne, Mr. J. W. Stanley Burmaster, Lieut.-Colonel Z. G. Burmester, Dr. A. Hope Gosse, Mr. S. Harold Hargrove, and Dr. Robert Robertson.

Honorary Medical Staff. During the year the Hospital, and the Medical profession in general, suffered a severe loss in the death of Dr. L. S. T. Burrell, M.R.C.S., F.R.C.P., an Honorary Physician and member of the Board since 1936.

The Board are pleased to announce that Dr. J. L. Livingstone, F.R.C.P., has accepted the post of Honorary Physician in London and desire once more to record their appreciation of the work done by the Honorary Medical and Surgical Staff, and the services rendered to the Hospital by Dr. G. Oliver Hempson the Medical Superintendent, and the other Resident Medical Officers.

Staff. Shortly before Xmas the Matron, Miss Marsh, who had not been well for some time, went on sick leave and has since resigned her post. Miss Marsh, who had been Matron since 1930, did much fine work for the Hospital and the Board wish her a speedy recovery and every success in her future work. Miss Milne, the Assistant Matron, has been appointed Matron and having regard to her work for the Hospital in the past, the Board have every reason to believe that she will fully justify her appointment as Matron.

At the end of the year Mr. L. R. Young, the Steward, announced his retirement after 25 years' devoted service to the Hospital. He takes with him the thanks and best wishes not only of the Board but of all his fellow members of the Staff. He has been succeeded by Mr. L. N. Keen.

During the year the Rev. E. S. Bartrum, Rector of St. Lawrence, and Chaplain to the Hospital felt that he could no longer carry out both duties and the Board reluctantly accepted his resignation. The Rev. L. A. D. Woodland has been appointed as full-time Chaplain to the Hospital.

The Board take this opportunity of thanking the Secretary and the other members of the Staff both in London and Ventnor for their continued excellent work during the past year.

Conclusion. Despite every effort, normal expenditure has increased so that it can no longer be met out of ordinary income. So serious has the position become that as from 1st January, 1939, the Board have decided to raise the fees to private patients by 2/- per week and to Public Authorities by 3/6 per week. This increase will not, it is felt, prove a great hardship to any one patient, and should result in increasing revenue by nearly £1,000 per annum. Even so it is doubtful whether income will be sufficient to meet expenditure, and as, in view of the international situation, the present seems scarcely a propitious moment for a general appeal, the Board hope that all Governors will do their utmost, not only to continue their own support, but also to enlist the sympathy and assistance of their friends.

THE SEVENTIETH ANNUAL GENERAL MEETING
OF THE GOVERNORS OF THE
ROYAL NATIONAL HOSPITAL FOR CONSUMPTION, VENTNOR,

was held at the

London Office, 18, Buckingham Street, Strand, W.C.2, at 4 p.m.,
on Monday, 8th May, 1939, when the President,

The Right Honourable LORD EBBISHAM, G.B.E.,
was in the Chair.

The Secretary read the notice convening the meeting

The minutes of the previous meeting dated 2nd May, 1938, which had been circulated, were confirmed.

In moving that the Report of the Board of Management and the Audited Statement of Accounts for the year ended 31st December, 1938, be received, adopted and circulated amongst the Governors, Subscribers and Friends of the Hospital the President said :—

" You may remember that when addressing you last year, I forecast a considerable increase in expenditure. This increase has taken place to the extent of £1,350, but since it has occurred exactly in those departments where it was expected, we can, I think, be sure that it was unavoidable. Income also increased, though, unfortunately, by only £100 ; it is, I think, rather remarkable that there should have been any increase at all, in view of the very difficult times through which the Country is passing.

" The financial position has, however, become so acute that, as from January 1st this year, it has been necessary to increase the fees of private patients by 2/- per week and to the Public Authorities by 3/6d. per week. The Board of Management do not think that this will prove a great hardship to any one individual (there has so far been no slackening in the number of applicants for admission) while it should produce a much-needed increase in income of nearly £1,000 per annum. Furthermore, MR. NUNN, to whom once more we have to express our deepest gratitude, has built an additional 9 bedrooms, which were occupied in February and the revenue from these will be a great help.

" One item in the accounts which I noticed with great pleasure is the increased income of the Patients' Guild of Helpers. As you know, this Guild was started some years ago as a means by which ex-patients could, if they wished, express their gratitude to the Hospital by contributing small sums towards the provision of those extras, such as the cinema and radio-gramophone, which could not be afforded out of ordinary income. That this Fund is steadily growing is heartening proof of the opinion that patients have of the Hospital. Later in the year we hope to hold an ex-patients' dinner in London at which friendships formed while in the Hospital can be renewed.

" As you know, we have for some time been endeavouring to improve the working conditions of our nurses and this year, a further step has been taken by the installation of a Press Lamp Signalling System on one Division. By this system, when a patient rings a bell, a large light on each corridor indicates the required floor and a small lamp lights up outside the actual room. This means that wherever a nurse is when a bell rings, she can see immediately where she is required, instead of having to run to the bell-indicator board in the Division kitchen.

" This experiment, which has been made possible by the generosity of COLONEL LEAF, has proved a great success from all points of view and it is hoped to extend the principle to the rest of the Hospital as and when Funds permit.

" I informed you last year that we had started a properly-organised 'follow-up' of all patients who had left since 1934 and the first results can be seen in the report which you have before you. I think you will agree that it affords striking evidence of the value of our work.

"The Medical Report for the year is again very satisfactory, showing as it does a high percentage of cases 'improved' and I think there is no doubt that the standard of treatment afforded at Ventnor is as high as anywhere in the Country. It is for this reason that I view the financial future with comparative optimism. As long as the present state of affairs in the world in general continues, we are bound to experience the greatest difficulty in maintaining, let alone increasing our income from voluntary contributions; but when things become more normal, I feel sure that the continued high level of our work will be reflected in the support given us by the general public.

"In the meantime, we can trust the Board of Management and the Staff to keep expenses as low as possible and we must all do our best to help keep income as high as possible."

COLONEL LEAF, in supporting the Motion, referred to the Chalets which had been built in the grounds for the use of convalescent patients and which were proving very popular with the patients; he also spoke of the clock in the Chapel Tower, which had been so kindly presented to the Hospital by **MISS TINGEY**, and which was not only most useful but also ornamental. Speaking of changes in Staff **COLONEL LEAF** mentioned the sad loss sustained by the Hospital through the death of **DR. L. S. T. BURRELL**, one of the Honorary Physicians in London, whose services over many years had been of such great benefit. Another change was the appointment of a full-time Chaplain which it was felt would prove a real benefit to the patients.

MR. BURMESTER, in seconding the Motion, gave explanations of the various fluctuations in income and expenditure which are incorporated in the Report of the Board of Management.

The Motion was then put to the meeting and carried unanimously.

It was proposed by **MR. HAROLD HARGROVE**, seconded by **MR. W. J. THOMPSON** and unanimously agreed that **MR. W. J. STANLEY BURMESTER, F.R.I.B.A.**, be re-elected Honorary Treasurer for the ensuing year.

MR. FRANK HARGROVE proposed that the following members of the Board of Management, who retire by rotation, be re-elected, namely:—**MR. JOHN BURGOYNE**, **MR. J. W. STANLEY BURMESTER**, **LIEUT.-COLONEL Z. G. BURMESTER**, **DR. A. HOPE GOSSE**, **MR. S. HAROLD HARGROVE**, and **DR. ROBERT ROBERTSON**. The Motion was seconded by **MR. T. S. PARRY** and carried unanimously.

It was proposed by **MR. JOHN BURGOYNE** and seconded by **LIEUT.-COLONEL Z. G. BURMESTER** that **SIR W. HARRY PEAT, K.B.E.**, of the firm of Peat, Marwick, Mitchell & Co., London, Fellow of the Institute of Chartered Accountants, be elected Honorary Auditor for the ensuing year. The Motion was carried unanimously and a very hearty vote of thanks to **SIR W. HARRY PEAT** for his services was passed unanimously.

In proposing a vote of thanks to the Honorary Medical & Surgical Staff and to the Honorary Medical Referees throughout the Country, **MR. CUTHBERT BURGOYNE** stated that he felt it was unnecessary for him to say how deeply indebted the Hospital was to these gentlemen; everybody knew how vital their work was to the Hospital and how fortunate the Hospital was in having such a brilliant and devoted Honorary Staff.

MR. HAROLD HARGROVE seconded the Motion, which was carried with acclamation.

Before proposing a vote of thanks to **LORD EBBISHAM** for presiding, **COLONEL LEAF** referred to the great kindness of **MR. H. TERRY WOOD** who granted permission to and greatly assisted **MR. TOMMY TRINDER** in making his collection for the Hospital, and it was unanimously resolved that he be elected an Honorary Life Governor of the Hospital.

COLONEL LEAF also proposed that **DR. J. L. LIVINGSTONE, F.R.C.P.**, who had recently been appointed an Honorary Physician in London, be elected a member of the Board of Management and the Motion was carried unanimously.

The proceedings terminated with a hearty vote of thanks to **LORD EBBISHAM** for his kindness in presiding at the meeting.

THE HAMILTON TRUST FUNDS.

The "Frederick Fund" and the "Hamilton Fund" were established through the generosity of the late Mrs. Frederick Hamilton ; the former by Deed of Gift, dated 5th September, 1872, for the purpose of "receiving gratuitously, subject to the rules of the charity for the time being, clergymen holding Evangelical opinions and of Christian character, and widows of clergymen, or unmarried daughters of clergymen, or other deserving persons of respectable character, who cannot well afford the expense as patients in the said Hospital." The latter was received in 1891, in accordance with her Will, for "the purpose of receiving gratuitously into the Hospital poor persons of respectable character."

Forms of application for the benefit of these funds are issued to Governors of the Hospital only, and may be obtained by Governors from the Secretary on application at the London Office, 18, Buckingham Street, Strand, London, W.C.2, and, when filled up, must be returned to the Secretary, together with a Medical Certificate (the forms for which can be obtained from the Secretary). They will be considered in rotation, and the most deserving cases selected by the Board of Management.

EXTRACTS FROM THE ROYAL CHARTER OF INCORPORATION.

Incorporation.

1.—For the purpose of maintaining and carrying on or extending its work and objects a Corporation consisting of a President and Governors shall be and is hereby Founded and Constituted by the name and style of “The President and Governors of the Royal National Hospital for Consumption and Diseases of the Chest, on the Separate Principle,” and shall by the same name have perpetual succession and a Common Seal. And by the name aforesaid to sue and be sued, and to do all other matters incidental or appertaining to a Body Corporate.

President.

4.—On the occurrence of any vacancy in the office of President of the said Hospital, the Governors of the said Hospital at the next or any subsequent General Meeting of the Governors to be held as hereinafter provided, shall have the power to elect some person to supply such vacancy, who shall hold office for one year, but be eligible for re-election at the next subsequent and following Annual General Meeting of Governors.

Governors.

5.—A vacancy in the office of President shall not affect the existence or title of the said Corporation, or the powers of the Board of Governors thereof.

6.—The several persons who are Governors of the said Hospital at the date of this Our Charter shall be Governors thereof during their lives or until resignation or disqualification.

7.—Every person elected or becoming in manner hereinafter provided a Governor or Honorary Governor of the said Hospital shall immediately become and be either for life or for a limited time a member of the said Corporation, with the right of exercising all the privileges belonging to a Governor.

17.—Persons who have conferred signal benefits on the Hospital may on the recommendation of the Board be elected Honorary Life Governors at the Annual Meeting of Governors.

18.—The privileges of Governors and Honorary Governors shall be fixed, prescribed, and varied as the Governors in Annual Meeting shall from time to time determine, and they shall be empowered from time to time to make and vary By-laws for the above purpose.

19.—The foregoing provisions as to the qualifications and privileges of Life and Annual Governors shall be subject to any alteration to be made under any By-laws relating to the said Hospital to be made as hereinafter provided.

BY-LAWS

OF THE

ROYAL NATIONAL HOSPITAL FOR CONSUMPTION AND DISEASES OF THE CHEST

ON THE SEPARATE PRINCIPLE

IN RESPECT OF

Qualifications and Privileges of Governors and Honorary Governors.

7.—The qualifications for becoming a Governor, the periods for which the respective ^g qualifications last, and the privileges during those periods shall be as follows :—

Qualification for becoming a Governor.	Period for which the qualification lasts.	Privileges during the period of qualification.
(1) The gift of one of the houses, which may bear the name of the donor, or any other name desired by the donor and approved by the Board.	Fifteen years if the donor is a Firm or a Corporation. For life if the donor is an individual, with the right to bequeath the privilege to any one person for life.	The right to have three patients always in the Hospital, if it is open, and there is room.

(2) A gift of not less than Five hundred Guineas either at one time or within a period of three years.

Fifteen years if the donor is a Firm or a Corporation.
For life if the donor is an individual.

(3) A gift of less than Five hundred but not less than Fifty Guineas either at one time or within a period of three years.

As above

(4) A gift of less than Fifty Guineas but not less than Ten Guineas.

One year from the date of payment.

(5) An annual subscription of not less than Fifty Guineas.

From the date of the first payment, and for each successive year while the subscription continues.

(6) An annual subscription of less than Fifty but not less than Five Guineas.

As above

The right to recommend annually one patient for the Hospital for every Fifty Guineas of donation, but not exceeding three patients at one time.

The right to recommend one patient to the Hospital for every Ten Guineas, but not exceeding three patients at one time.

The right to have one patient always in the Hospital, if it is open, and there is room.

The right to recommend one patient to the Hospital for every Five Guineas of subscription, but not exceeding three patients at one time

BY-LAWS—*continued.*

Qualification for becoming a Governor.	Period for which the qualification lasts.	Privileges during the period of qualification.
(7) Consecutive annual subscriptions of less than Five Guineas but amounting together to not less than that sum.	One year from the date of the last subscription making up the Five Guineas.	The right to recommend one patient to the Hospital for each completed Five Guineas.

8.—Executors or Trustees of Wills who contribute to the Hospital, under a power giving them discretion to select the Charitable Institution or Institutions to be benefited, shall be entitled to nominate one of their number to receive the privileges such person would have been entitled to if the actual donor of the contribution.

9.—Any clergyman, minister, or other person who has by collection obtained for the Hospital sums amounting to not less than One hundred Guineas within three years, may be elected a Governor for life, or any less period, with the privilege of recommending one patient annually for every One hundred Guineas collected, but not exceeding three patients at any one time.

10.—The privileges of Governors shall be exercised subject to any “Regulations as to admission of Patients,” from time to time in force.

11.—Every Governor (including an Honorary Governor) shall have, at a General Meeting of Governors, the same number of votes as the number of patients he is entitled to recommend in the year in which the Meeting is held, but not exceeding three votes in all. A Governor entitled to have always one patient in the Hospital shall have three votes, and a Governor entitled to have always three patients in the Hospital shall have five votes.

12.—In the case of a Firm, Corporation, Company, or Society being a Governor, a member of the Firm or officer of the Corporation, Company, or Society may be deputed to attend the General Meeting of Governors, and to vote in the name of such Firm, Corporation, Company, or Society.

13.—The Board may at any time grant special privileges in consideration of a donation of not less than One thousand Pounds. Such privileges need not be of the nature prescribed by these By-laws, and they may be granted either to the donor or to some other person nominated by the donor for the purpose but in no case shall they confer the right to more than five votes.

14.—No Governor shall be entitled to vote at any General Meeting unless he shall have been qualified as a Governor for the period of six months

15.—No Annual Governor whose subscription is in arrear shall be entitled to recommend a Patient, or vote at any General Meeting.

16.—Annual Subscriptions shall be considered to fall due in each year on the date of payment of the first subscription.

ANNUAL SUBSCRIPTIONS.

An Annual Subscription of £5 5s. constitutes the qualification of a Governor, and it is the intention of the Royal Charter that an Annual Governor shall be one who will continue this subscription yearly.

ISSUE OF LETTERS OF RECOMMENDATION

Letters of Recommendation are issued as they become due to Governors, who are respectfully requested to be so good as to reserve their Letters (as far as possible) for those patients in whom they are directly interested.

Governors are reminded of the great advantages available at this Institution (with its unrivalled situation in the Undercliff of the Isle of Wight) for patients who are unable to meet the usual cost of treatment, at a private sanatorium.

Letters not required will be gratefully received at the London Office. Deserving applicants will thus be assisted in obtaining admission to the Hospital.

LIST OF
GOVERNORS AND SUBSCRIBERS
ARRANGED ALPHABETICALLY.

CORRECTED TO DECEMBER 31st, 1938.

LIST OF GOVERNORS AND SUBSCRIBERS

ARRANGED ALPHABETICALLY.

Corrected to DECEMBER 31st, 1938.

Donations of Five Guineas and under are omitted after having been published ONCE in the Report.

Donations of more than Five Guineas and less than Thirty Guineas are continued in this List for five years only.

Donations under £1 are acknowledged on page 99.

By-Law 16 states that "Annual Subscriptions shall be considered to fall due in each year on the date of payment of the first subscription."
